

REENVA

COMPANY PROFILE · RE-ENGINEERING AND INNOVATION

Reenva at a glance: what we do, who we help and how we work.

Reenva re-engineers how mid-sized companies run: one connected Microsoft system in place of a dozen bolt-on tools, a live view of the whole business, and secure AI agents that do real work.

Based in Melbourne, with a presence in the UAE, the UK and India.

reenva.com.au/company-profile · Profile updated 25 October 2026

This profile is a summary as at 25 October 2026. The current version is at reenva.com.au/company-profile. It is not an offer: terms are agreed in writing.

/01 · KEY FACTS

An Australian company that simplifies your systems first, then adds AI.

WHAT WE DO

One connected system. One live view of the business. AI that does real work. Plus custom software.

BUILT ON

Microsoft: Business Central, Fabric, Power BI, Power Automate and Azure OpenAI

HOW WE DELIVER

Fixed price · Our engineers work as part of your team

BASED IN

Southbank VIC 3006, Australia

PRESENCE

Melbourne · UAE · UK · India

Australia, the United Arab Emirates, the United Kingdom and India

COMPANY

REENVA PTY LTD · ACN 699 587 409 · ABN 52 699 587 409

EMAIL

info@reenva.com.au

PHONE

+61 412 176 324

HOURS

Monday to Friday, 8:30 am – 5:30 pm, Melbourne time

PROFILE UPDATED

25 October 2026

/ 02 · WHAT WE DO

Five areas of work, starting with fewer systems, then trusted numbers, then AI.

Run on one system

One connected Microsoft ERP in place of scattered apps, so you can run fewer licences and stop re-keying.

Connected ERP: Replace scattered apps with one Microsoft ERP, so data flows without re-keying and you can pay for fewer licences.

See your business

One live view of the business, in numbers every leader trusts.

Live business dashboard: See sales, finance and operations on one live screen, with numbers every leader trusts.

Business data assistant: Ask about sales, stock or margin in plain English and get an answer showing its source.

Business data platform: Connect every system's data into one trusted source, ready for dashboards, reports and AI.

Put AI to work

Agents and automations that read, check and act in your own Microsoft environment. A person approves key actions.

Custom AI agents: Hand repetitive work to an AI agent built for your workflow, with a person approving key actions.

Process automation: Approvals, data entry and reconciliations run on their own; only the exceptions reach your team.

Company knowledge assistant: Staff find policies, procedures and past project answers in seconds, with the source document cited.

Hands-free voice assistant: Field, warehouse and site staff ask for live stock or job data out loud.

Report on ESG

For Australian companies: climate reports aligned to AASB S2, with an audit trail. Another company's platform, sold by Reenva.

ESG reporting platform: Capture ESG data once and produce climate reports aligned to AASB S2, with an audit trail.

Build custom software

Custom software and apps built for how your business works, where off-the-shelf tools don't fit.

Product development: Custom software and mobile apps built for how your business works, where off-the-shelf tools don't fit.

Also: Microsoft licensing offer. See all services.

For mid-sized companies that pay for many systems and still work by hand.

For the leaders who run the business

Reenva works with CEOs and managing directors, CFOs and finance directors, COOs and operations directors, and owner-operators of mid-sized companies.

Three lead sectors

Wholesale and distribution

Manufacturing

Construction and trades

Reenva's services also fit property development, retail, professional services, financial services, government and software companies. [See all industries.](#)

The problems Reenva fixes

- The company pays for a dozen systems, and staff still copy data between them by hand.
- Nobody can give a straight, current answer on how the business is going.
- Every vendor says AI, but nobody shows what it would do for the business or whether the data is safe.
- Software and licence bills keep growing.
- Australia only: climate reporting is coming, and the business is not set up for it.

Reenva takes on work in Australia, the United Arab Emirates, the United Kingdom and India. The ESG reporting platform is for Australian companies only.

Built on Microsoft, and connected to the systems you already run.

Dynamics 365 Business Central

One connected ERP in place of scattered apps, so staff stop re-keying.

Microsoft Fabric

Every system's data in one trusted data platform.

Power BI

Live dashboards, in numbers every leader trusts.

Power Automate

Routine work runs on its own.

Azure OpenAI

AI agents that work in your own Microsoft environment. A person approves actions that matter.

Reenva can connect your Microsoft system to other systems you run, including Procore, Aconex, Estate Master, Shopify, Lightspeed, Iress, Class, Xplan, TechnologyOne, CoreLogic, Salesforce, HubSpot, SAI Global, Datapel, Xero, Cm3, Avetta, RAPID.

Reenva builds on Microsoft but is not a Microsoft partner. If you're committed to SAP or Oracle, we're probably not the right fit.

/ 05 • HOW A PROJECT RUNS

Know the price before the build starts, and own what we build.

01 • 30 MINUTES

A 30-minute call

Tell us the problem. We say plainly whether we can help.

02 • 2 WEEKS • FIXED FEE

A two-week fixed-fee review

We map how the work flows, check the data and find the real bottleneck. You get a clear go or no-go.

03 • FIXED PRICE

A fixed-price build

We simplify first, then build in your own Microsoft environment. Where we replace a system, old and new run side by side until you switch.

Reenva's engineers work as part of your team.

Four promises Reenva makes

- Fixed-price projects.
- You own 100% of the IP in custom builds.
- If it misses the agreed outcome, we fix it.
- We reply within one business day.

04 • AFTER GO-LIVE

You own it

You own 100% of the IP in custom builds. If it misses the agreed outcome, we fix it.

/06 • WORK OUR TEAM HAS DELIVERED

Work our team has delivered, with measured results.*

30%

Less time from order to dispatch. An eight-branch wholesale distributor. [Read the case study](#)

1 screen

Replaces 14 separate weekly reports. A property developer. [Read the case study](#)

10x

Analytics query throughput, plus a new revenue line from data products. A shipping software platform. [Read the case study](#)

58%

of identified procurement-margin leakage recovered. A national horticulture wholesaler. [Read the case study](#)

60%

Less total time on tender responses. First drafts in under 30 minutes. A tier-2 construction subcontractor. [Read the case study](#)

[See all work our team has delivered](#)

* Some of this work was delivered by Reenva's founder and team before Reenva was formed.

/ 07 • WORKING WITH REENVA

A fixed price, IP you own and your data in your own environment.

A fixed price, agreed up front

Every build has a fixed price, agreed in writing before the build starts.

You own your custom builds

You own 100% of the IP in custom builds. This excludes the resold ESG platform and third-party licences.

Your data, in your own Microsoft environment

For Australian clients, data is stored in Microsoft's data centres in Australia, in your own Microsoft environment. For clients in the UAE, the UK and India, data is stored in the Azure region you choose. You decide who gets in, through your own sign-in. Some of our engineers work from India and the UAE (Dubai) and may reach your environment through your sign-in. We agree in writing how your data is handled, who can reach it, and from where.

[Privacy policy: how we handle your data](#)

Talk to us. We reply within one business day.
